Professional Summary

Motivated final-year Computer Science student at Tshwane University of Technology with a strong academic record (72.66% average) and hands-on experience in Java development, Linux system administration, and database design. Skilled in troubleshooting, application development, and collaborative teamwork. Passionate about leveraging technology to solve real-world problems and improve community living standards.

Technical Skills

Achievements

-  Consistently strong academic performance in technical modules (72.66% average)
-  Recognized for leadership and initiative in group projects (A-Team)
-  Produced clear, structured technical documentation

Certifications

Career Interests

Languages

🇬🇧 English (Fluent)

🇿🇷 IsiZulu (Native)

🇿🇷 IsiXhosa (Conversational)

Education

🎓 Tshwane University of Technology (TUT)

Diploma in Computer Science | Expected Graduation: May 2027

Current Average: 72.66%

Key Modules: Object-Oriented Programming, Advanced OOP, Web Computing, Information Security, Database Principles, Principles of Programming

🏫 Phillip Ndimande Senior Secondary School

National Senior Certificate (Matric) | 2022

Project Experience

Intelligent Health Validation System (IHVS)

🇯🇵 Java | 🇯🇵 JSP | 🇲🇻 MySQL | 🇬🇱 GlassFish | 🇯🇵 JDBC | 🇲🇻 MVC Pattern

Web-based healthcare platform developed in a 6-member team (A-Team).

- Implemented role-based authentication, medical aid eligibility validation, and appointment lifecycle management using Servlets and JDBC
- Integrated automated reminder engine and Patient Reliability Index (PRI) for attendance analytics
- Designed layered MVC architecture ensuring scalability, security, and maintainability
- Contributed to database schema design and event-driven workflow documentation

Event Management System

🇯🇵 Java | 🇬🇱 GUI | 🇬🇱 File Handling | 🇲🇻 OOP

- Developed desktop application with add, edit, delete, and search functionality
- Applied OOP principles to design scalable features
- Led a team of 4, coordinating tasks and resolving technical issues

Bookstore Database System

🇲🇻 SQL | 🇲🇻 MySQL | 🇬🇱 Database Design

- Designed and implemented normalized relational database
- Created SQL queries for inventory tracking and sales scenarios
- Ensured data integrity and efficient organization

Organic Glam - E-Commerce Website

 HTML5 |  CSS3 |  JavaScript |  LocalStorage

- Built responsive e-commerce platform for natural skincare brand
- Implemented shopping cart with persistence and WhatsApp integration
- Deployed on Netlify with full functionality

Ubuntu Virtual Machine Recovery & CMS Setup

 Linux |  VirtualBox |  System Administration

- Diagnosed and repaired broken VM environments
- Restored system functionality and configured working environments
- Documented recovery processes for clarity and repeatability

Practical Exposure

-  Troubleshooting software, driver, and system issues
-  Installing and configuring development tools and virtual environments
-  Debugging Java applications and resolving runtime errors
-  Working with Linux systems for configuration and recovery
-  Version control with Git and GitHub
-  Collaborative development using Agile methodologies

Availability

Open to Work Integrated Learning (WIL) Opportunities

Seeking internship, graduate programme, or junior software developer role through ICEP. Available immediately for opportunities in South Africa or remote.
